# Use case

Step 1:

1. Install the app.
2. Open the app, and you will see the UI as following:

Step 2:

1. Click the red line

2. Input something that you wan to save to the list and then click Go. For example, if you want to save the note, like: "This is my note". You will see as following picture:
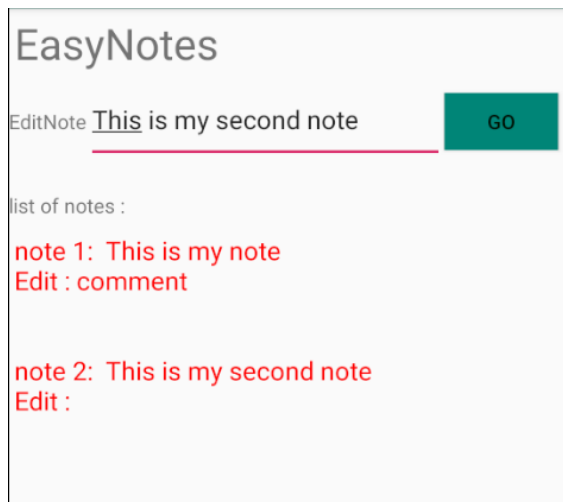

The red text is your note, "note 1" is just a list number of your note. The behind of list number is your note. and then if you want to modify your notes or just want to add some comment. Please click the screen on the right space, like you want to add comment for

your note 1, you will see :

Step 3:

1. Now, you have already saved your first note on your app. If you want to continue to save your next note, you just need to delete the text on the line and input your next note. the action please see the Step 2. There is an example for the operation,
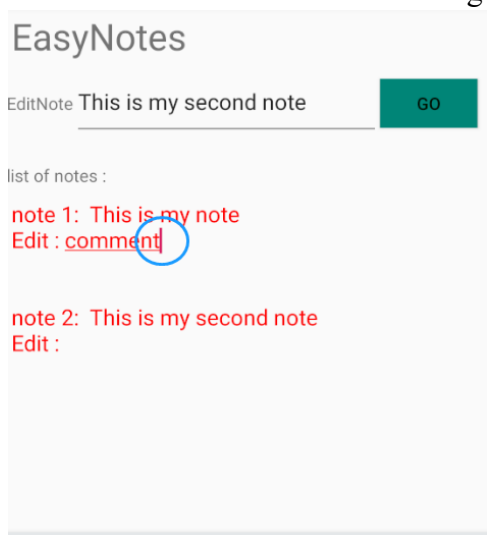

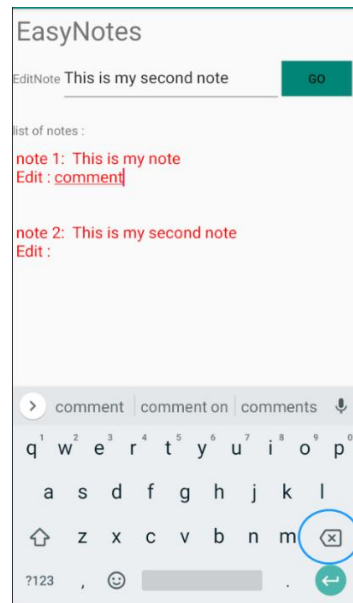

, now you can see your second note is on the blow of your first note.

2. If you want to modify or just add some comment for your second note, doing the step2.2.

3. For the adding more notes, you just need to do the step 2 to 3 and you will get more notes that you want to save.
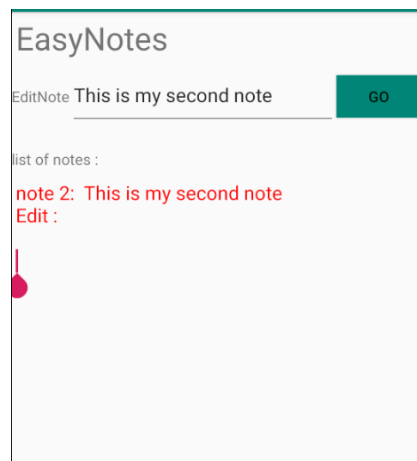

Step 4:

1. The above case is to add note. Now let me introduce how to delete the notes. For example, if you want to delete your first note, you should find the location of your first notes and click the right space on your screen, like this:

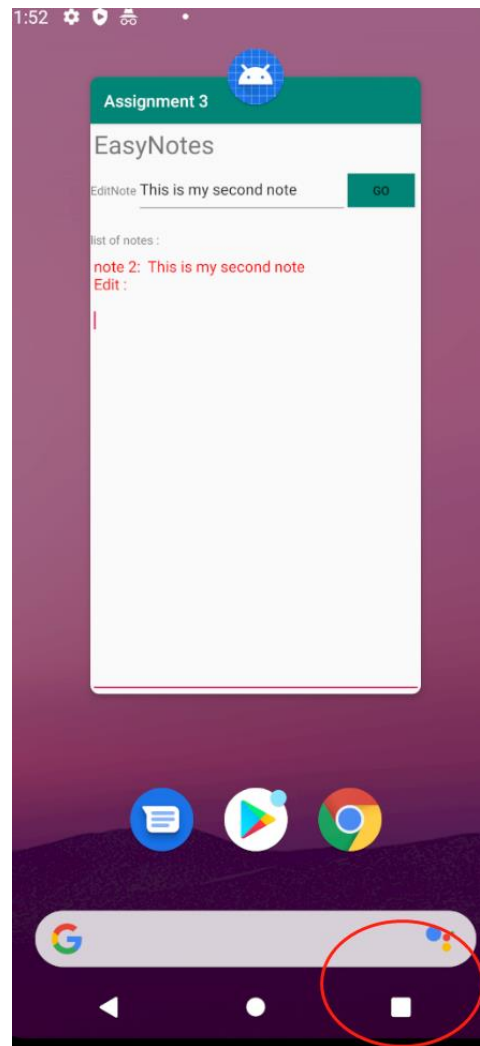

,

2. And then, delete the content. You will get that as

following picture: .

3. After the deleting, you can add your new note(just doing the step 2 and 3).

Step 5:

1. If you finish your operation, click to drop out app.
